Baltimore City Public Access TV Petition

We the undersigned call on Baltimore City Council members to reject the proposed cable contract with Comcast (Bill 04-1504) because it lacks provisions for public access TV. We also call on City Council and Board of Estimates members to require that any cable franchise agreements for Baltimore City guarantee a dedicated, ongoing revenue stream to be paid directly to the non-profit organization that will manage public access TV – the Public (P) part of Public, Education and Government (PEG) Access – as well as facilities, equipment, multiple activated channels and other provisions equivalent to or exceeding those provided to the best public access TV organizations in the nation.
